

minutes

Friedrich-Alexander-Universität
Erlangen-Nürnberg

Sub project / GAP (incl. sub projects): GAP I: A01, A04, B03, D04, D05

Date and location: Zoom, 10.06.2022

Participants: Bräunig, Pulsmeier, Heyder, Eisele, Lu, Yip, Albrecht, Müller, Steigleder, Wirth

Keeper of the minutes: Johanna Bräunig

Date and location for next meeting: Zoom, 08.07.2022

topic 1 - title

content/description:

Synchronization between radarbooks and vital sign (VS) radar for machine learning study.

The additional information from the VS radar can be used by A04 and is a back up solution in case the radarbooks/MIMO radars don't gather enough information for our machine learning approach to succeed.

Summary:

- Use trigger board to output a trigger to the radarbooks and output a trigger puls that is recorded by ADC of the VS radar
- Markus will ask Fabian about the connector and voltage specifications

topic 2 - title

content/description:

We need to plan a new date for the test measurements for the machine learning study from

Summary:

- Additional bed for measurement studies not available yet
- Next planned date is 23rd June 2022
